 00:22 Communicates directly with physician.  
 00:46 "no protective gloves used"  
 01:00 HR: 80 BP = 124/72 SpO2: 98 etCO2: 34 mmHg  
 01:10 Trend started: MonHR Trend  
 01:18 "Suze communicated the airway problems to the group vey well. Remember to be short and precise in your communications. Knowledgeable themes are nine of the important aspects in acute situations."

02:04 HR 45 BP 120/75 SpO2 98 RR 12

02:25 Can ventilator/ Can't intubate  
 02:25 identify patient by ID band  
 03:12 Respiration rate = 20  
 03:13 Tongue edema maximum  
 03:13 Decreased cervical range of motion on  
 03:14 Pharyngeal obstruction on  
 03:12 Respiration rate = 20  
 03:13 Tongue edema maximum  
 03:33 Decreased cervical range of motion on

## Refresher Courses

# Laerdal Services Solution

## Refresher Courses

This one day course for up to eight participants is delivered at your facility by our Field Service Specialist or Educational Service Specialist.

Refresher courses offer repetition and refresher knowledge of the Getting Started and Software courses. Course participants can reinforce their knowledge of simulation, operation and features of the simulator; and practice utilizing the equipment. If you just need your knowledge refreshed or you have turnover of staff this is an appropriate course for you.

**Available courses:**

- Refresher Course Simulator and SimPad
- Refresher Course Simulator and LLEAP
- Refresher Course Simulator and Legacy Software\*

\* This is the only course for SimMan classic, ALS Simulator, SimMom, SimJunior, SimBaby or SimNewB with the older Legacy Instructor Application software.

Agenda of the Refresher courses:

The agenda is typically derived from the two courses based on your specific learning objectives.
